SPECIMEN LABEL

LIQUID ICE MELT quickly penetrates and dissolves snow and ice accumulations by lowering the freezing point of water. Special additives prevent ice from reforming and snow from adhering for hours. LIQUID ICE MELT spreads evenly across all surfaces to provide fast, effective deicing action while reducing product runoff. Its unique formula is non-toxic to plants and will not harm concrete, asphalt, wood or painted surfaces. To prevent painful falls, embarrassing and costly liability suits, use LIQUID ICE MELT every time it snows.

DIRECTIONS

Coverage: 1 gallon per 500 – 750 square feet.

General Use: LIQUID ICE MELT is ready-to-use. DO NOT DILUTE. Spray, pour, or sprinkle liberally on surfaces covered with snow or ice. It will become diluted as it works, therefore reapplication may be necessary for heavy layers of ice, sleet, or during heavy rainfall

To Treat Glazed or Clare Ice: Score ice in a vertical or horizontal manner to assure thorough penetration, rapid thaw, and prevent runoff. Pour LIQUID ICE MELT into the scoring and allow it to penetrate. Remove slush by shoveling.

Sand Application: Add 5 to 10 gallons per cubic yard of sand. Spread treated sand at the rate of 50,000 to 60,000 square feet per cubic yard

CAUTION

HARMFUL OR FATAL IF SWALLOWED.

FIRST AID

IF IN EYES: Flush eyes and under eyelids with plenty of cool water for at least 15 minutes. If irritation persists, obtain medical attention.
IF ON SKIN: Wash with soap and water. Remove contaminated clothing and launder before reuse. If irritation persists, obtain medical attention.
IF SWALLOWED: Contact physician or poison control center immediately. Give affected person 1 to 2 glasses of water. Do not induce vomiting unless told to do so by a physician or poison control center. Never give anything by mouth to an unconscious person.
IF INHALED: Remove person to fresh air. If breathing has stopped, administer artificial respiration. If irritation persists, obtain medical attention.
