LEMON ODOR CONTROL
is a fresh, new approach to the difficult problem of controlling offensive odors in sewage plants, aerators, sewer mains and laterals, garbage and refuse containers, haulers and dumps, and lagoons.

LEMON ODOR CONTROL effectively neutralizes odors without affecting bacterial action in digesters, lagoons, filter beds, septic tanks or drain fields.

DIRECTIONS:
To control odors in aerators, lagoons, open digesters and filter beds, inject undiluted LEMON ODOR CONTROL into the line leading to the source of odor. The amount of LEMON ODOR CONTROL injected will vary with temperature, air movement and intensity of odor to be controlled. Another method is to use equipment to spray or mist undiluted LEMON ODOR CONTROL over the the source of the odors, allowing air movement to carry it over the area, mixing it with the odors, vapor or fumes. To control odors in sewer mains and laterals, pour, spray or drip undiluted LEMON ODOR CONTROL into the lines. Also spray manholes and drains thoroughly. For garbage and containers, trucks and dumps, spray undiluted LEMON ODOR CONTROL liberally over the source of the odors. Deodorize the containers, conveyors and trucks regularly using LEMON ODOR CONTROL.

WARNING:
This product contains, or may contain, trace quantities of a substance(s) known to the state of California to cause cancer and/or reproductive toxicity.

For additional information, see Safety Data Sheet.

INGREDIENTS/CAS #: Water/7732-18-5; Isopropanol/67-63-0; Linear Alcohol Ethoxylates/34398-01-1; Fragrance/Proprietary; d-Limonene/5989-27-5

NFPA® RATINGS:
Health: 1; Flammability: 3; Reactivity: 0
