Metal parts won’t corrode or lock when you coat them with **RYBS** from Share Corporation. This clinging lubricant contains moly, graphite and aluminum to prevent parts from seizing and galling when operating under intense heat and pressure. **RYBS** has been proven in temperatures ranging from -20°F to 2,000°F. When sprayed onto threaded components, **RYBS** provides a lubricating film between parts that prevents corrosion and seizing. It’s an excellent general purpose lubricant for metal to metal contacts such as hinges and seals around boiler inspection ports. **RYBS** contains no chlorinated or fluorinated solvents.

**INGREDIENTS/CAS#:**
- Heavy Naphthenic Petroleum Distillate (64742-52-5)
- Propane/n-Butane (68476-86-8)
- Heptane (142-82-5)
- Aluminum (7429-90-5)

**NFPA® RATINGS:**
- Health: 1
- Flammability: 3
- Reactivity: 1

**DIRECTIONS:**
Surface must be free of dirt, grease and oil. Shake can for at least 30 seconds. In upright position, hold nozzle 8 to 10 inches from surface and apply by spraying **RYBS** in short bursts. Assemble and wipe off excess.

**RESPONSE:**
**IF ON SKIN:** Wash with plenty of water. If skin irritation occurs: Get medical attention. Take off contaminated clothing and wash before reuse.
**IF IN EYES:** Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical attention.

Avoid breathing fumes, mist, vapors, and spray. Use only outdoors or in a well-ventilated area.
**IF INHALED:** Remove person to fresh air and keep comfortable for breathing. Call a poison center or doctor if you feel unwell.
**IF SWALLOWED:** Immediately call a poison center or doctor. Do NOT induce vomiting.

**STORAGE:**
Store locked up.

**DISPOSAL:**
Dispose of contents and container in accordance with local, state, and national regulations.

**Net Weight:** 13 ounces (369 g)

See back panel for further cautions and first aid instructions.

**KEEP OUT OF REACH OF CHILDREN**
