GLIMMER is an excellent cleaner and protector for use on a multitude of surfaces. It comes out of the can as a thick, rich foam that clings to the surface and immediately begins deep cleaning and removal of dirt, grime, oil, and other contaminants. It provides long-lasting UV protection from the harmful rays of the sun. It quickly cleans, polishes, and conditions all surfaces. The cleaning action will allow the grime to be floated away and leave only a shiny protective barrier behind.

**INGREDIENTS/CAS#:**
- Propane/Isobutane/N-Butane (68476-86-8)
- Sodium Nitrite (7632-00-0)

**KEEP OUT OF REACH OF CHILDREN:**
Refer to SDS for further information.

**SUPPLEMENTAL INFORMATION:**
2.46007% of the mixture consists of ingredient(s) of unknown toxicity.

**DIRECTIONS:**
- Always shake can well before use and never apply to what one would deem an overly muddy, soiled surface. The product will perform at its best when applied to a pre-cleaned or semi-clean surface.
- When applying to tires, spray 6 to 10 inches from substrate and let the product work. No wiping is necessary. (Take care to not apply to brake rotors, drums or motorcycles since brake dust run-off is not a concern. (e.g. stained driveways).
- When applying to vinyl, plastic or rubber substrates spray 8 to 10 inches from surface taking care not to over-apply the product. Let the product soak into the substrate for roughly 20 to 30 seconds before following with a soft cloth. The foaming action will allow for the grime to be floated away and leave only a shiny protective barrier behind.

**STORAGE:**
Protect from sunlight. Store in a well-ventilated place.
