ELECTRICAL EQUIPMENT COATING

DANGER!
EXTREMELY FLAMMABLE LIQUID AND VAPOR.
VAPORS MAY CAUSE FLASH FIRE.
CONTENTS UNDER PRESSURE.
VAPOR HARMFUL.
See Other Cautions on (Back/Side) Panel
KEEP OUT OF REACH OF CHILDREN
Net Weight: 16 oz. (454 g)

JUST RED is a unique aerosol coating specially formulated to protect electrical equipment. It forms a flexible insulating coat that quickly dries to a tough, glossy and non-conductive finish. The dried film resists cracking and chipping, protecting electrical equipment against chemicals, oil, moisture and corrosion. The flexible film has formed a strengthening bond with the subject, helping to prevent delaminating and cracking to cause current leaks, shorting and flash-off, insuring optimal efficiency of electrical equipment. It exhibits high arc resistance and has high dielectric strength. JUST RED is great for use by electrical suppliers, mechanics, industrial maintenance shops, manufacturing plants and utility plants.

DANGER:
Extremely flammable aerosol. Contains gas under pressure; may explode if heated. Causes skin irritation. Causes serious eye irritation. Suspected of causing cancer. Suspected of damaging fertility or the unborn child. May cause drowsiness or dizziness. May cause damage to organs through prolonged or repeated exposure.

PREVENTION:
Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Keep away from heat, sparks, open flames, and hot surfaces. - No smoking. Do not spray on an open flame or other ignition source. Pressurized container: Do not pierce or burn, even after use. Wash thoroughly after handling. Use with adequate ventilation. Avoid direct contact with eyes, skin, and clothing.

RESPONSE:
IF ON SKIN:
Wash with plenty of water. If skin irritation occurs: Get medical attention. Take off contaminated clothing and wash before reuse.

IF IN EYES:
Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

IF INHALED:
Immediately call a poison center or doctor. Do NOT induce vomiting.

IF EXHALED:
If exposed or concerned: Get medical advice or attention.

INGREDIENTS/CAS#:
Acetone, propan-2-one, propanone (67-64-1); Propane (74-98-6); Iron Oxide (1309-37-1); Butane (106-97-8); Toluene (108-88-3); n-butyl acetate (123-86-4); 2-(propyloxy)ethanol, EGPE (2807-30-9); 2-propanol (67-63-0); Xylene (1330-20-7)

DIRECTIONS:
PREPARATION:
Surface must be clean and dry before painting. For best results, use solvent-based paint on untreated surfaces. Test small area for compatibility and adhesion. Apply several light coats for a better finish than one heavy coat. Be sure the first coat is dry before applying a second coat. The rate of cure will vary with the film thickness, temperature and humidity. The typical curing time is 24 hours. Recoat in 3 to 6 months or as wear indicates.

APPLICATION:
Shake can at least one minute before and occasionally during use. Spray surface with steady, even strokes at a distance of 8 to 10 inches. Several light coats give a better finish than one heavy coat. If clogging develops, turn spray button 1/4 turn or remove and clean button slot. Do not stick objects into can opening. If exposed or concerned, get medical advice or attention.

WARNING:
This product contain, or may contain, trace quantities of a substance(s) known to the state of California to cause cancer and/or reproductive toxicity. Non-flat paint products do not exceed 1.40 MIR.
